History and Notes:	Man sprayed Roundup RTU Weed and Grass Killer Extended Control Plus Weed Preventer II from Monsanto on his grass 4 days ago. Within a few hours, the application was followed by heavy rain. The dog went out into the grass and rolled around on it, before coming in the house. His spouse has recently been to doctor for new prescription of Flexeril and a steroid. At some point, she had an anaphylactic reaction causing her throat to "close up". She went to the ER, was given medicines and released from the hospital. No previous history of allergic reactions other than usual seasonal allergy to pollen. Wife did not spray the Roundup nor come in direct contact with the wet product. She would have gotten residue from the dog's fur if any. MRPC discussed the product toxicity. The symptoms do not correlate with the expected response to the product.
